PATENT

REMARKS

Claims 9 and 31-40 are pending in the application. Claims 9, 33, 36, and 39 are independent.

Claims 9 and 31-40 have been rejected under 35 U.S.C. §103(a) as being anticipated by U.S. Patent No. 5,522,075 ("Robinson") in view of U.S. Patent Application No. 2002/0069335 ("Flynn").

In response, claims 9, 33, 36, and 39 have been amended to clarify at least one distinction between the present invention and Robinson and/or Flynn. Specifically, amended claim 9 requires the identifying and determining to be *within said processor mode*. The examiner cites paragraphs 0009 and 0010 of Flynn as describing the determining. However, Flynn describes the control program gaining control for the determining, which is the opposite of the determining within said processor mode of the present invention.

Therefore, Robinson and/or Flynn do not render obvious any of independent claims 9, 33, 36, or 39, or of any of their dependent claims. Accordingly, the withdrawal of the rejections of claims 9 and 31-40 is respectfully requested.
